AWARD WINNING

At Axis Co., Each project combines modern ideas with local culture, making spaces that are both beautiful and practical. Abdullah and his team start by listening carefully to their clients, understanding the story of the place and considering the environment and culture. One of his favorite projects, villa Was- sat in Jeddah, the villa mixed modern style with Saudi traditions. It includes open-plan interiors, private courtyards and natural materials. The design balances past and future, elegance and comfort, making the villa feel like a true home. Sustainability and innovation are important in every project. Abdullah uses energy-saving methods, renewable energy, smart systems and modern digital tools. Looking ahead, Abdullah wants Axis Co. to leave a legacy of endless vision-designs. He hopes their buildings tell stories, enrich communities and set examples for smart, sustainable and culturally aware design in the Middle East and beyond.
